

## Cylinder Trolleys

We are one of the leading Manufacturers of Cylinder Trolleys for the cumbersome big cylinders as well as small cylinders. These trolleys are specially designed in accordance to industrial quality standards and are used to hold & easily transport heavy compressed gas cylinders from one place to another. Equipped with large solid rubber tired wheels and castors, these ensure better mobility over both rough and even surfaces. Offered at best industrial prices, these comprise of the following:

We provide high quality single cylinder trolleys that feature arc welded tubular steel construction for

strength. Our trolleys are procured from trusted vendors and thus ensure excellent finish with scratch resistant and high gloss. Available in variety of sizes, these can be availed at level headed prices.

### Features:

- Rubber tired wheels for quietly and smooth rolling
- Castors for better mobility over rough or even surfaces
- Electrostatically applied oven baked powder coat
- Can handle one jumbo cylinder of 7 cum. capacity
- The operator has greater control over the trolley
- Easily retractable rear wheel assembly
- Cylinder is held securely by a safety chain
- Include braking wheels and a tool box

## Double Cylinder Trolley

We also offer superior quality double cylinder trolleys sourced from well established manufacturers. These are equipped with retractable rear castors that provide better mobility as well as greater control over the trolley. Each trolley is tested and inspected to ensure higher efficiency both at manufacturer's end and at our premises. We offer these at best industrial prices.

### Features:

- Can handle two jumbo cylinders of 7 cum. capacity
- Ease off mobility with longer handles
- Good load control
- Dual binding chains for extra security
- Extra load handling safety
- Solid rubber front wheels
- Include braking wheels (rear wheels can be locked)

## Gas Cylinder Cabinets

These cabinets have been designed to house gas cylinders to prevent unauthorized access to the cylinders and for the safe handling of cylinders.

The cabinets can accommodate manifolds and systems that provide precise control and purging capability.

The cabinets are of sturdy steel construction, spray painted or powder coated. They are provided with an acrylic window for quick viewing of control equipment. The full length door has a three point latching mechanism and locking handle. Cylinders are mounted with brackets.

Standard cabinets are available for 2, 3 or 4 cylinders of 47 ltr. water capacity.

## Gas Cylinder Brackets

These simple devices are designed to hold cylinders firmly either in the field or in a room attached to walls or other fixtures. These brackets are of powder coated with sturdy steel construction with 2.nos nylon belts. These brackets are available for all sizes and capacities of cylinders

We offer a comprehensive range of drum trolleys and three way trolleys. These drum trolleys are used for carrying closed containers and partially filled drum.

Three way trolleys manufactured by us are available in varying load capacities as per the requirement of our clients. This trolley can be used in three ways as per load.

- Vertical for smaller loads
- Inclined for medium loads
- Horizontal for heavy loads

**Some of the basic features of drum trolleys and three way trolleys :**

- Easy to handle
- Easy to maintain & service
- Light weight & modular
- Durable

## **LPG trolley**

Deluxe industrial gases provide trolley for LPG cylinders.
